DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 1 – 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1 shows a barrier and a quantum well but, in fact, for a layer to be a well, it must be surrounded by two barriers. It is not understood how the claimed structure can form a quantum well. Correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in-
 - (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
 - (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

5. Claims 1, 5 - 9, 11 – 14, 16 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Koide et al.

Application/Control Number: 10/033,349

Art Unit: 2814

6. Koide et al. shows (see cover Figure and column 4, line 28) a GaN light emitting device with a first type conducting layer 3a, a lower confining layer 3b, a spacer layer 5a, an active layer 5, a cap layer 5c, an upper confining layer 7b and a second conduction type layer 8.

7. With respect to claim 5, the barrier and well are 3.5 nm (column 4, line 51) and the well is $\text{In}_{0.16}\text{Ga}_{0.84}\text{N}$.

8. With respect to claims 8 and 9, 3b is 0.5 microns thick and has a doping of $2(10)^{17}$ (column 4, line 43).

9. With respect to claims 11 – 14, 7b is 75.5 nm thick, is doped with Mg to $2(10)^{17}$ (column 5, line 45).

10. With respect to claims 16 and 17, 5a and 5c are 3.5 micron layers of GaN (column 4, line 50).

Claims Objected to

11. Claims 2 – 4, 10, 15 and 18 - 21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
